

## **Highlight of New Features 2010**

(Over 60 new features for OMSVision users)

### **New Features**

- OMSVision Mobile using eSync
- iConfident Bridge – online implant treatment planning
- Document Center
- Communications Tab
- PBHS Collaborator

### **Enhancements**

#### **Security**

- Audit trail for changes from financial cycle 3 -> 4
- Audit trail for addition of patient 'No Statement' marker
- Audit trail for prescriptions written/edited
- Prescription lock feature for prescriptions that are older than today

#### **Appointment**

- Cancellation lists can now be filtered by location
- Patient prefix will now be displayed on the appointment line
- New Preference setting that would prevent the user from manually entering a patient name when scheduling – forcing the user to paste from a list. (prevents errors)
- New Auto fit feature to print the appointment schedule on one page.
- Right click to access Progress Notes
- When a patient cancels an appointment and does not reschedule the comments associated with the appointment now transfer to the call list entry

#### **Referrers**

- \*New Personnel tab to track referral office contacts

#### **Reports**

- Filter graphs from reports
- Interactive Call list

## **Insurance**

- Pre-load fees into insurance tables to be effective on the specified future date

## **Posting/Financial**

- Multiple line item delete in the ledger with security
- \*New intelligence for anterior vs posterior CDT codes to prevent error

## **EMR**

- New Preference setting to Auto Lock all unreviewed EMR narratives after X days – user definable
- EMR Case Review – when reviewed the user can lock the case. We have added a Locked By feature.
- \*New Redesign: SOAP formatted screen// Left to Right navigation

## **Patient Information**

- \*Ability to quickly retrieve the last 10 patients viewed. (enhanced menu feature)
- Comments section from pre-registration now transfer automatically into the patient section of the insurance tab
- Treatment Plan – focus (cursor) will stay on the current line item when editing rather than jump back to the top of the treatment plan.
- Treatment Plan –show treatment plan on the following insurance carriers: None/All/Medical only/Dental only. This will mimic when posting work.
- Duplicate Social Security Number – when the alert pops, provide the user with the name of the duplicate patient.

## **Digital Radiography**

- Dexis Integrator
- \*Bridge to Kodak 9000
