With Implant Center, you can now:

- Automatically create a shopping list for the office to use while reordering when inventory hits a trigger threshold
- Store details about every implant-related procedure done in your office for outcomes and inventory reporting
- Receive automatic alerts when reminders and procedure follow-up are needed, and when inventory expiration dates come due

Implant Center[™]

Designed specifically for specialty practice management systems, Henry Schein's Implant Center[™] introduces full-featured tracking of all implant inventory, automated reorders, patient procedures and even referring practitioners. With EHR, Vital Signs Monitors, and multiple partner integrations providing a wide complement of auxiliary services, Implant Center joins the full suite of Henry Schein's Specialty Software group.

Reports And Inventory Management

Let Implant Center take all those inventory hassles off your hands. Reports and inventory management are a breeze with Implant Center's robust database-not only can you search patients and run reports from any given criteria, you can set Implant Center to automatically order from your manufacturers when inventory is low. You can also monitor effectiveness of certain models, and even use Implant Center's reports to support outcomes studies.
