OMSVision ePrescribe

Now you can send prescriptions electronically from OMSVision to retail and mail order pharmacies with just one click.

Henry Schein OMSVision ePrescribe automates the process of writing prescriptions and transmitting them to pharmacies, while preventing potentially dangerous drug-to-drug interactions, drug allergies, dosage errors and other problems that can occur when writing prescriptions on paper.

Accessible instantly, from anywhere, with no downloads or new hardware required, OMSVision ePrescribe is a web-based means for oral and maxillofacial surgeons to send prescriptions electronically to retail and mail order pharmacies with one click from within the OMSVision software—and maintain all information in the OMSVision EHR.

Convenient for Patients, Convenient for You: Store and Report from OMSVision EHR

With OMSVision ePrescribe, your practice can now create and send electronic prescriptions, including schedule II controlled substances, to a pharmacy at the point of care. OMSVision ePrescribe launches from OMSVision, and all drug information for the patient is stored back in OMSVision EHR. This means you can run prescription reports from OMSVision ePrescribe and access a patient’s history from anywhere. This means your office staff can work faster and more efficiently. Simply put, you and your staff can streamline operations to provide better care and save time doing it.
OMSVision ePrescribe Helps Protect Patient Safety

Currently, the inefficiency and health hazards of handwritten prescriptions can undermine your responsibility to provide safe and effective care. If you are using paper prescriptions, providing reliable information and treatment can require consulting several different systems and records, often while patients wait on the phone.

OMSVision ePrescribe gives you the power to instantly verify patient eligibility, medication history, drug and allergy interactions, and patient-specific formularies with just a few clicks. By working directly with the pharmacy, you not only provide a seamless experience for patients, you reduce the likelihood of paperwork errors. OMSVision ePrescribe helps prevent potentially dangerous drug-to-drug interactions, drug allergies, dosage errors and other problems that can occur when writing prescriptions on paper.

OMSVision ePrescribe Facilitates Compliance

OMSVision delivers the industry’s first integration with Allscripts ePrescribe, making it the only fully integrated web-based e-prescribing solution available for oral surgeons.

Powered by Allscripts. Provided for Your Practice by OMSVision

Allscripts is the world’s leading provider of electronic prescription technology for the medical industry. OMSVision is proud to be the first oral surgery-specific practice management software to leverage the power of the world’s leading e-prescription system for oral and maxillofacial surgeons.

OMSVision ePrescribe Features

When you get a call from someone requesting a new prescription, you can know within seconds whether the caller is a patient. With OMSVision, you can search the patient’s name and their essential information, including:

- New retail and mail-order prescription routing and renewal
- Instant prescription benefit eligibility and formulary
- Comprehensive prescription benefit reporting
- Full prescription history for any patient
- Drug interactions, correct dosages, adverse reactions and duplicate therapies
